Serbia
Slovakia
Slovenia
Spain
Sweden
Switzerland
Turkey
Ukraine
United Kingdom

EUREKA initiative is...

nationally financed

“Each country fund its own firm from national R&D funding programme”

market-oriented and bottom-up

What has been done in EUREKA so far?

Ambient Ecologies envisage a paradigm shift will take place . . .

ITEA AMEC

When everyday products will become connected, building embedded, intelligent & interactive systems with seamless interfaces to backend internet services, in which the user takes a central place

What has been done in EUREKA so far?

Setting new standards for broadband Internet

MEDEA+ 106 INCA

Developing an even faster broadband connection that can carry innovative digital services to Europe's homes and offices

What has been done in EUREKA so far?

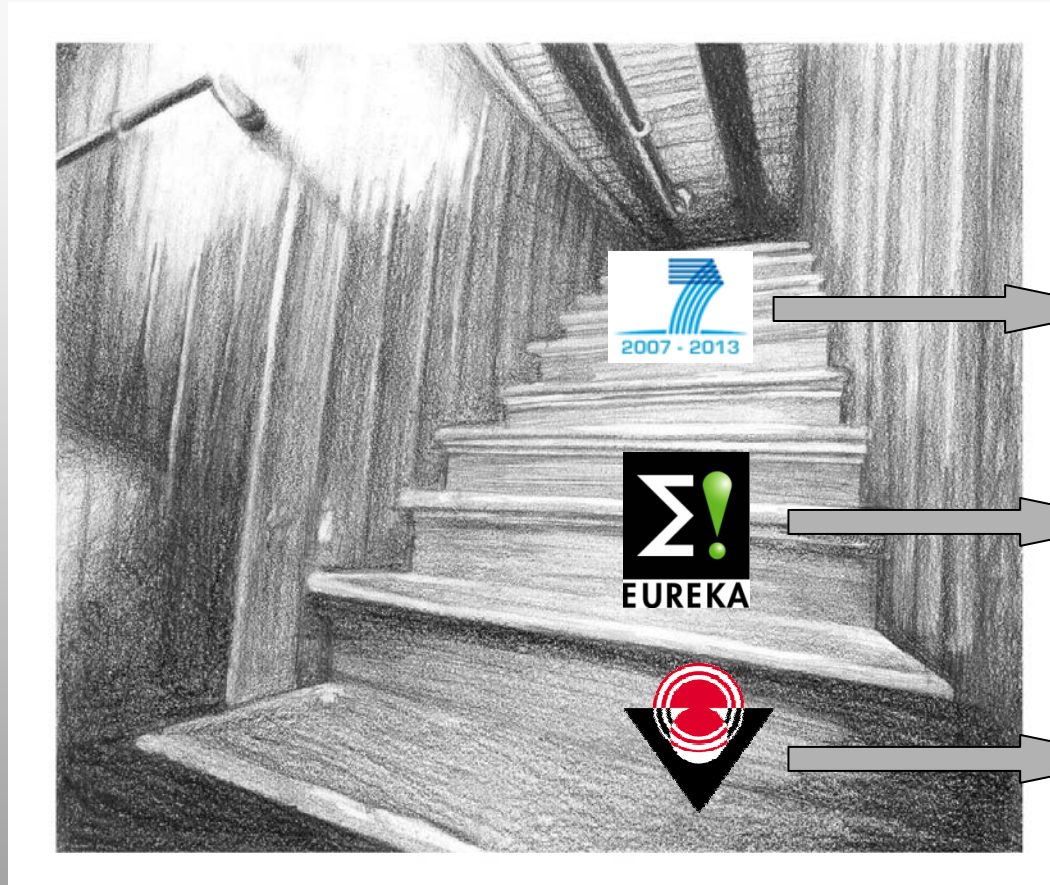

Computer systems assisting orthopaedic surgeons

E! 2288 MEDAC

Computer-aided orthopaedic care, helping orthopaedic surgeons to document their cases as well as manage and analyse patient data

Alternatives for your project idea

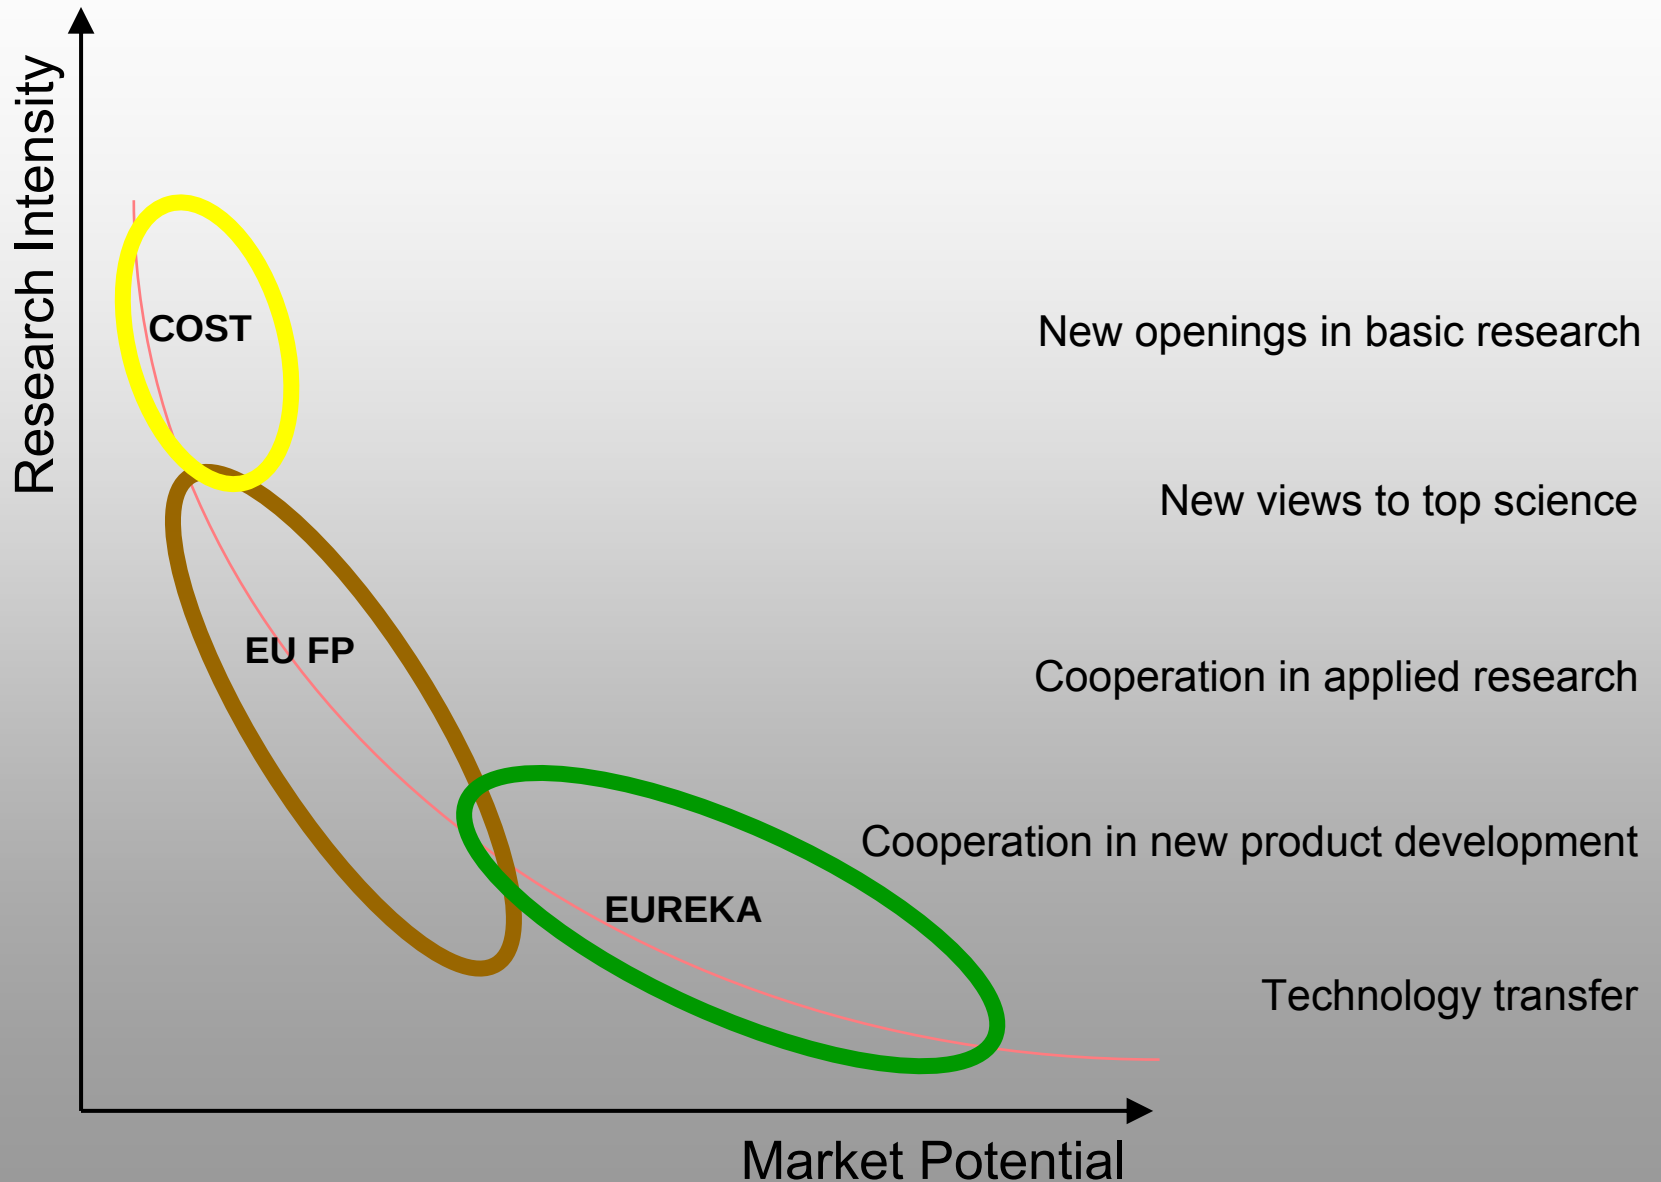

Framework Programmes

EUREKA

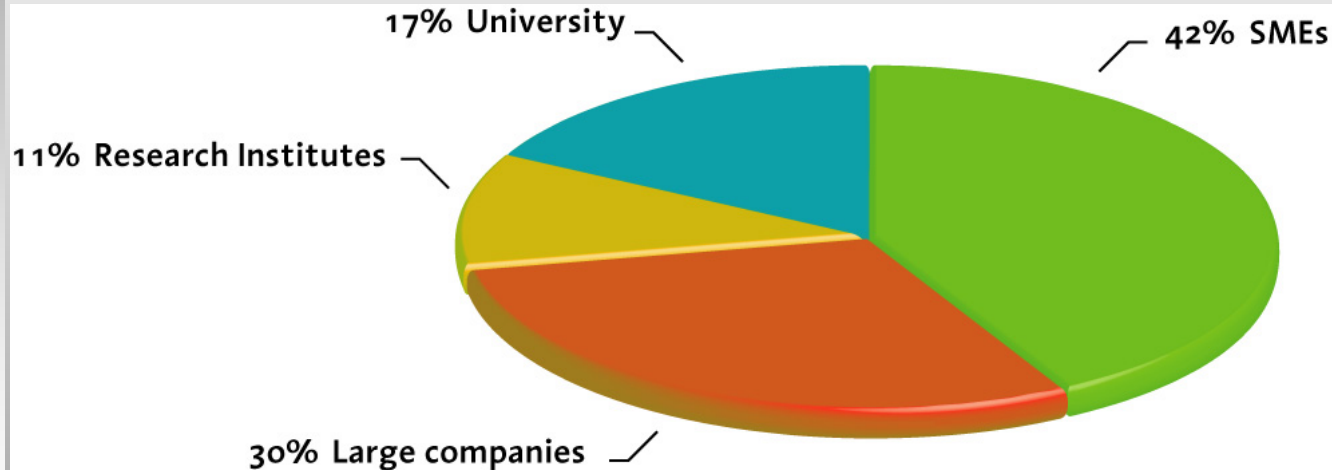

National Funding

Alternatives in international arena

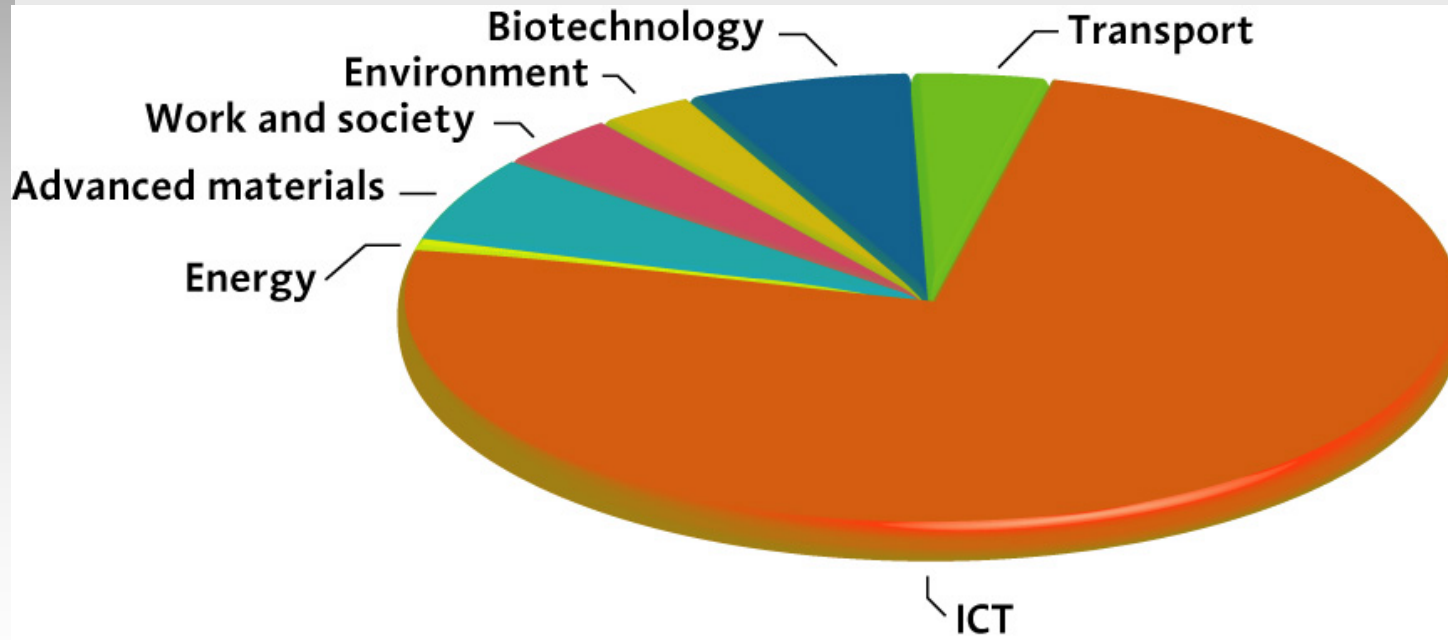

Who participate in EUREKA projects?

Nearly 13,000 partners from across Europe – and beyond

Technology areas

Turkish National Funding System for EUREKA

- New funding programme was launched in 2007
- Maximum grant ratio for all applicants:
 - SMEs can receive 75% of all eligible R&D costs
 - Large companies can receive up to 60%
- No budget limit
- No limit for duration of the project
- Additional favors for some special collaborations

Opportunities in EUREKA

Innovative Projects

EUROSTARS

Clusters

Individual Projects

- Multilateral/bilateral projects
- Involve participants from at least two EUREKA member countries
- Small, short term projects (1-2 years)
- Ready-to-market results
- Result in a product, process or service representing a significant advance in their sector

How can I initiate innovative project(s)?

Search E! database
www.eureka.eu

Contact your partner
share your idea
eureka@tubitak.gov.tr

Check Turkish EUREKA website
www.eureka.tubitak.gov.tr

Special opportunities for innovative projects:

Turkey, Israel, Ericsson Joint Call for Mobile Technologies

- Advanced Voice Services
- Integrated Communication
- Location Technologies
- TV and Multimedia Services
- Service Management
- Value Added IP services

<http://www.ericssonpartnerport.com/eureka>

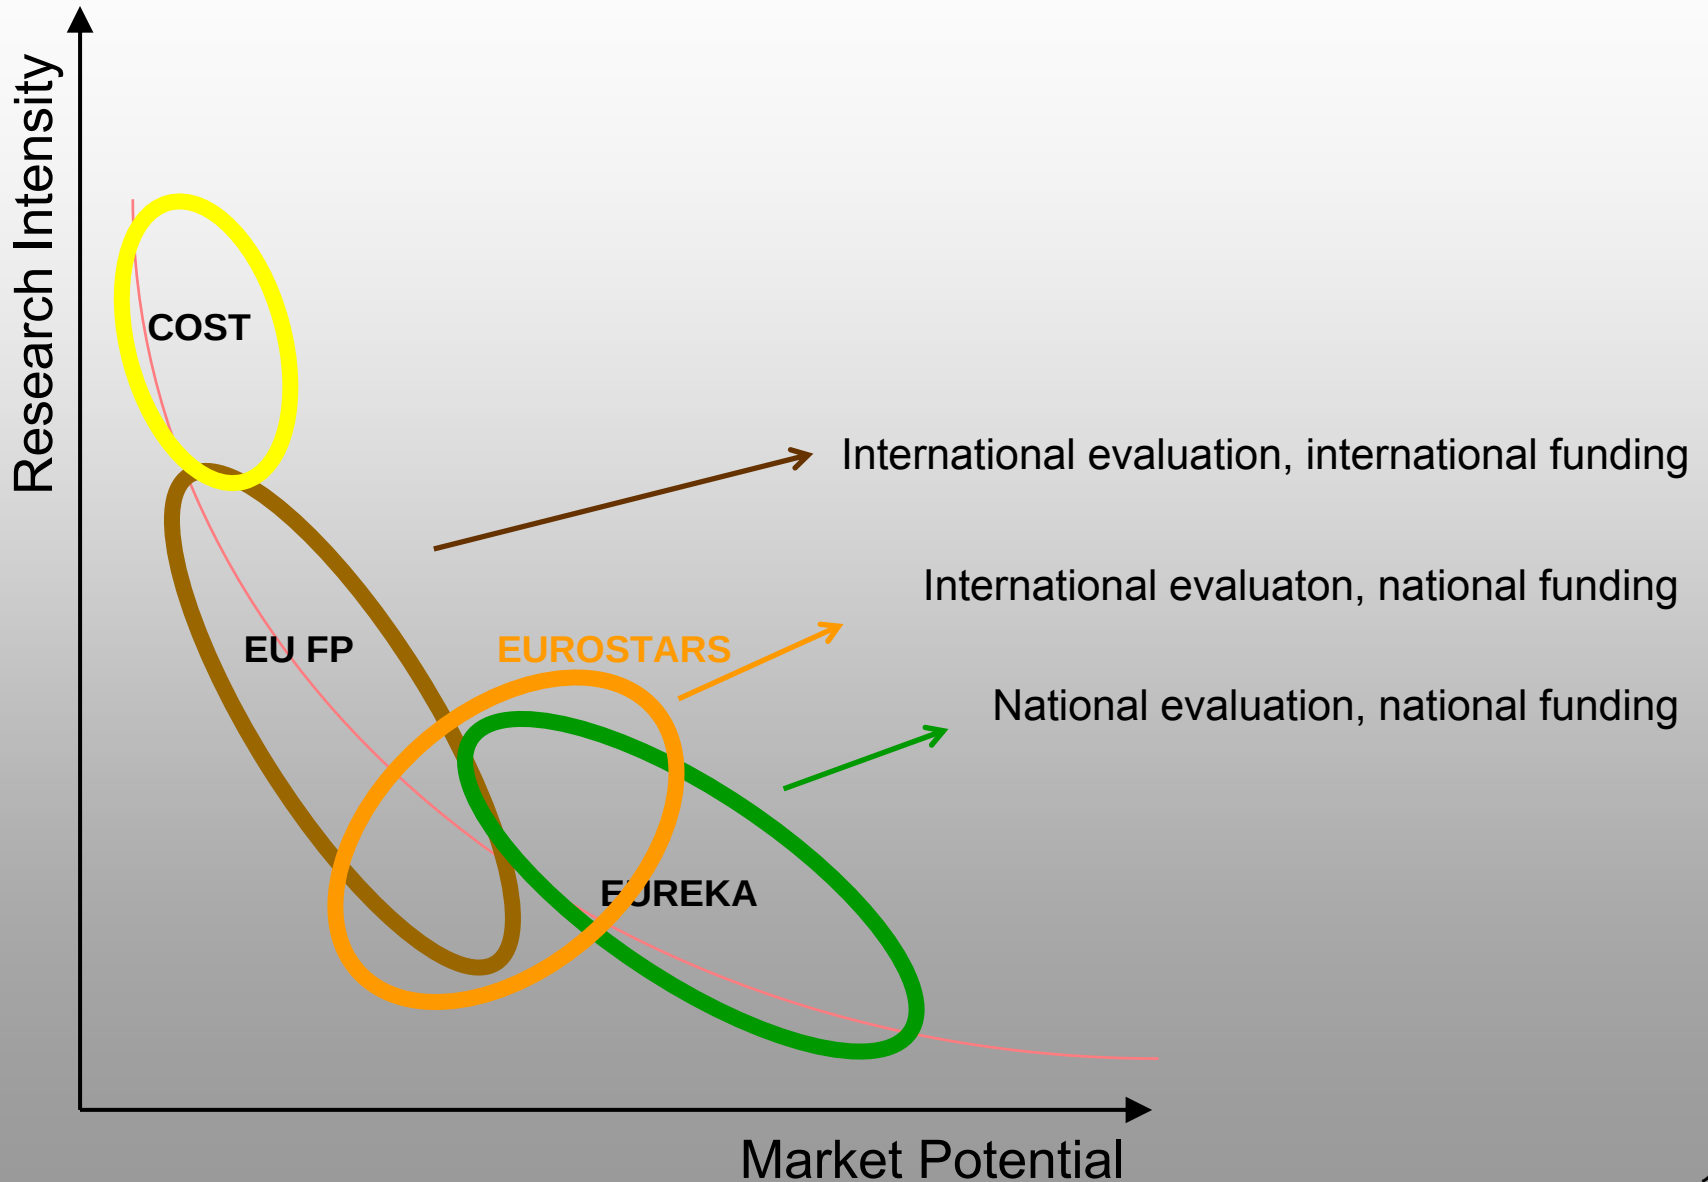

First bilateral cooperation for international R&D cooperation in Turkey

- Active technical guidance on project proposal preparation provided by TÜBİTAK & MATIMOP
 - Matchmaking support by Ericsson
 - Results:
 - 15 project idea received
 - 9 project applications submitted
 - 7 project applications approved
- (Total project budget: 9 M€)

EUROSTARS

www.eurostars-eureka.eu

EUREKA Clusters

- Long term, strategically-initiatives
- Large number of participants, many from Europe's major companies (i.e. Philips, Airbus, Telefonica, Alcatel-Lucent)
- Develop generic technologies of key importance for European competitiveness

Advantages of being in clusters

- To work with European leaders
- to discover new possibilities
- To guarantee your market position in next 5-10 years
- To continue your collaboration in other platforms/ Easy adaptation of FP7

How can I involve cluster project(s)?

ITEA2 -> Fc ITEA2 Info Day in systems

CELTIC -> T€ Amsterdam

MEDEA+ (CA 21-22 February 2008

Identify right cluster

Do not miss international info days

Register to ITEA2 database

Preparation of PO (project outline)

Preparation of FPP (full project proposal)

Apply for national funding

www.itea2.org/partner_search

The screenshot shows the ITEA 2 Partner search website. The browser window title is "ITEA 2 - Partner search - Mozilla Firefox". The address bar shows "http://www.itea2.org/partner_search". The website has a green header with the ITEA 2 logo and navigation links: About ITEA 2, Partners, Projects, Project calls, News & events, Partner search (active), Publications, Press area, and Links. A sidebar on the left contains links for Register, Search database, and Login. The main content area is titled "ITEA 2 Partner search" and includes an "Introduction" section. The introduction text reads: "Welcome to the ITEA 2 Partner search. Looking for associates to discuss starting a new project? Perhaps you already have a clear project idea but still need partners? Or you want to join an existing consortium? This is a good place to search for and establish contact with people from other companies and institutes who are interested in participating in an ITEA 2 project. The ITEA 2 Partner Search is a free on-line service that is open to all, which means that it can greatly facilitate the formation of consortia and the definition of project proposals. However, when using this medium for partner search, *always be aware of the open nature of a public website.* You can use it to freely search for partners or project ideas - focusing on specific technologies, domains, or key applications - or you can refine your search with other keywords. Note that you need to register if you want to be able to:

- get in contact with partners
- express your interest in a project idea and, after approval by the owner of the idea, join a consortium
- publish your own partner profile
- submit a project idea for which you are looking for partners

 You can specify key technologies, domains, applications and other keywords and specify the type of partners you are looking for."

How can I involve participate project(s)?

- New & simple application form designed for cluster applications
- Speed evaluation process for national applications (~1 month)

EUREKA Clusters: ITEA2

Technology domain: Software intensive systems & services
